

April 2022

To our families, loved ones, and friends,

As we head into the Summer season, we are so excited to continue in-person visitation here at our community!

We have included a few supportive visitation guidelines to review prior to your visit:

All visitors will now be required to present a negative COVID-19 test result (rapid or PCR test) within 24 hours of their scheduled visit.

Each visit will require a negative test within 24 hours of the scheduled visit. Visitors are also required to wear a disposable surgical mask throughout their entire visit.

We recommend obtaining a negative COVID-19 result prior to arriving at our community to expedite the check-in process. All visitors will continue to be pre-screened through temperature checks and a dedicated COVID-19 questionnaire.

Additional COVID-19 tests will be made available for visitors who are unable to access a test prior to their visit.

Thank you for your ongoing support as we continue to take every precaution to ensure the safety and wellness of our community at-large.

Sincerely,

Susan Welge, LNHA

Administrator
